berolina Software Solutions

Fleet & Service Management

Now
60-day
free trial.

The perfect solution for the monitoring and analysis of printing systems Including automated and process-controlled printer services and remote printer maintenance

Manufacturer independent

Deployment in all current printing systems; integration of older systems

Transparency

Only those who are aware of what is printed can save costs

Productivity

Correct process weakness and gain time!

Profitability

Savings of up to 30 %, cost center billing

Prevention

Still before the technician arrives, the history and the current error status can be checked

Simple handling / flexibility

Very easy monitoring and control of the systems

Security

You pre-specify the IP range; no access to your network

The aim?

Creating the basis for a cost-effective and optimized print-infrastructure throughout the enterprise

For our customers:

For 360° service contracts from 36 months duration the Fleet & Service Management is included free of charge.
